

Translating the Evidence:

Best Practices for Human Milk Feeding

This 5.5 CE program will be led by Dr. Paula Meier, who is a pioneer in the area of research and practice for the use of human milk in the NICU. She will provide evidence about the impact of human milk feedings on the health outcomes and costs of care for premature and late preterm infants. Dr. Meier will focus on arming attendees with clinically proven, evidence based methods for successfully establishing human milk & breastfeeding programs that target these at-risk populations. Specific examples of complex human milk management strategies for these infants will be highlighted.

Presenter:

Paula Meier, RN, DNSc, FAAN

Program Schedule	
8:30 am – 8:45 am	Welcome
8:45 am – 9:45 am	The Evidence: Does Human Milk Really Make A Difference in Short and Long-term Outcomes for the NICU Infant?
9:45 am – 10:00 am	Break
10:00 am – 11:00 am	The Rush Mother's Milk Club: Strategies to Remove Barriers to Human Milk Feedings in the NICU
11:00 am – 11:15 am	Break
11:15 am – 12:15 pm	Protecting Maternal Milk Volume in the Pump Dependent Mother
12:15 pm – 1:15 pm	Lunch <i>(provided)</i>
1:15 pm – 2:30 pm	Human Milk Feeding in Complicated NICU Scenarios: Case Studies and Management Strategies
2:30 pm – 2:45 pm	Break
2:45 pm – 4:00 pm	Supporting Lactation in the Late Preterm Infant and Mother: A Population at Risk
4:00 pm – 4:30 pm	Questions and Answers

Date: April 22, 2009

Time: 8:00 am – 4:30 pm

Location:

Hilton Durham

(near Duke University)

3800 Hillsborough Road

Durham, NC 27705
